Custom-made children's play- and bedroom, made out of plywood.

The children's bedrooms can be closed with a sliding door.

The beds have a spare bed underneath so that the friends of the children can stay over easily.

The boy's as well as the girl's bedroom have identical bureaus.

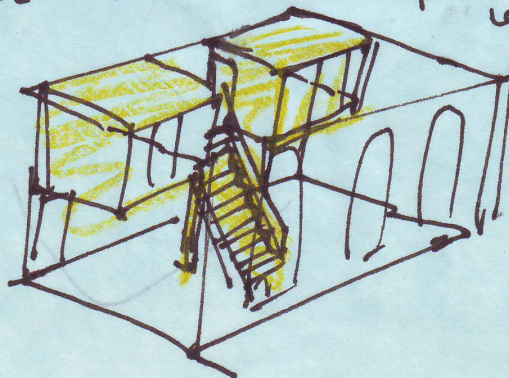

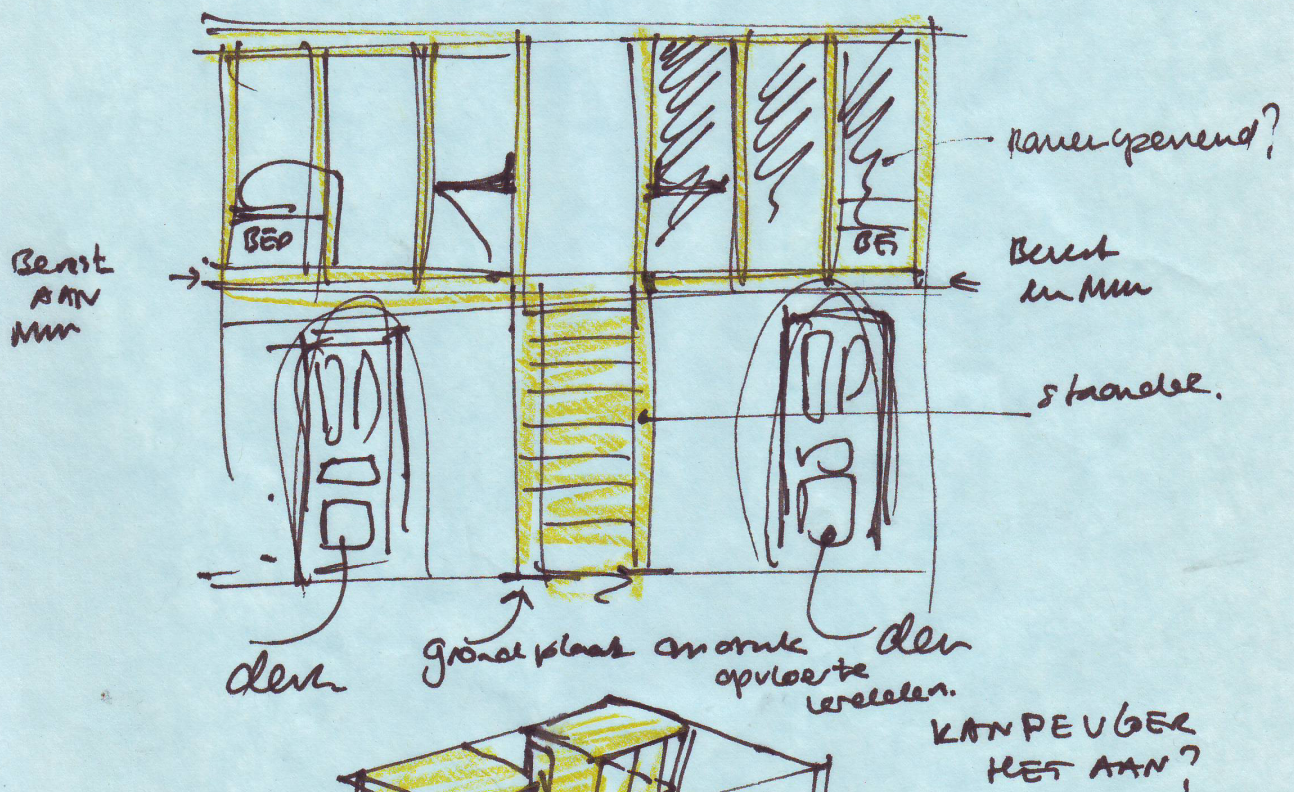

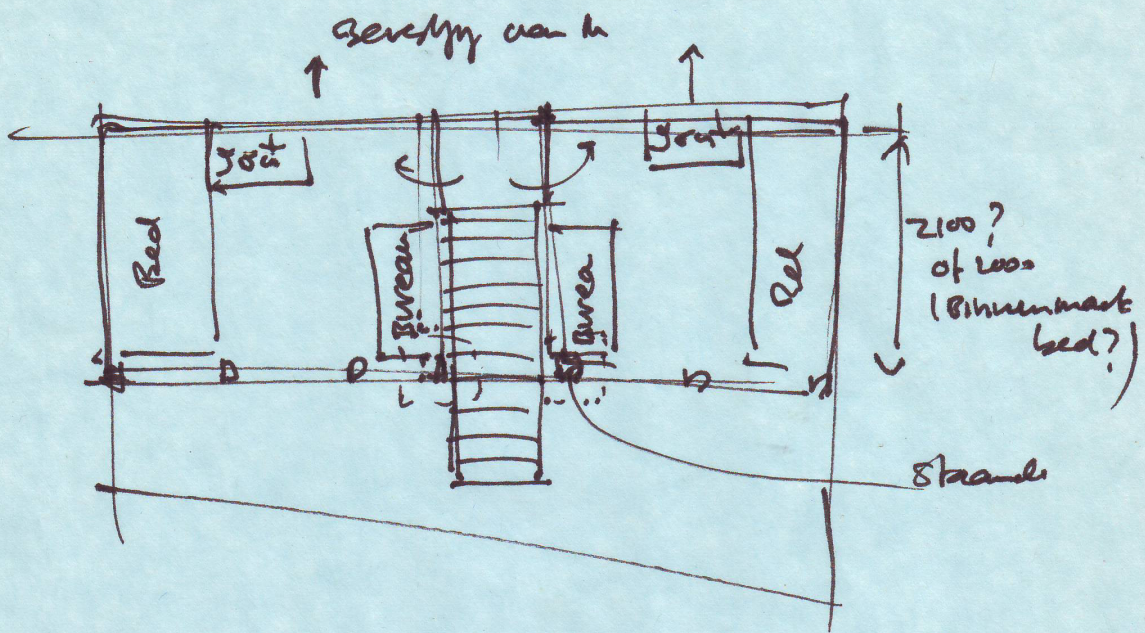

This design inspired us to create a whole new Crisis 2013 collection of different sized cabinets.

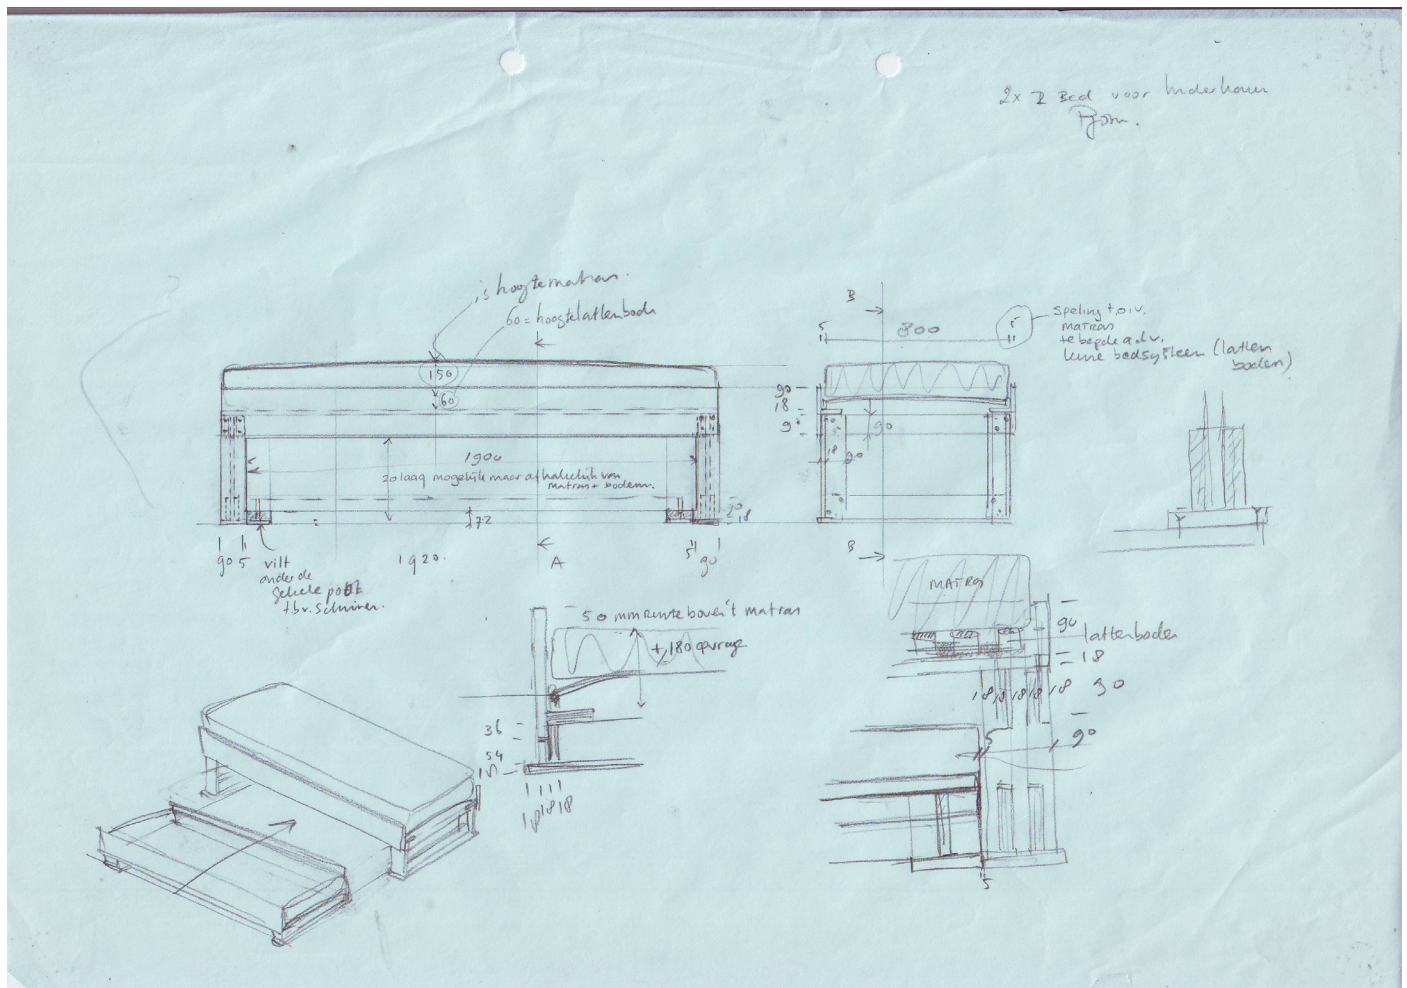

Even the lock is made out of plywood.
