

PIET HEIN EEK

FUTURE ICONS

NYC WATER TOWER FURNITURE We just couldn't wait with a project that actually isn't a project yet. Together with Diederick Kraaijeveld, we ordered a container full of water tower wood from New York. He is going to use it to make sculptures and we will make furniture. We will then jointly present the work in the showroom, where our furniture is normally displayed. A lot of transport, you might think, but the idea is to ultimately have the furniture made in New York so that the wood, which is now always discarded, is reused locally.

When we finally received the container full of wood, I couldn't wait to get started. The reservoirs are made mainly of cedar wood, a wood that is very moisture and weather proof and very lightweight. In short, an ideal material for making structures on roofs. The as-wide-as-thick-table and chairs, made from oak, which we launched in April, will now gain a little cedar bother in the form of an armchair. The width of the wood is almost the same width of the beams, whereby the patina of time remains visible on the roofs. We will also make a dresser with the cedar wood and by taking the beams, which vary in size, as starting point, and adjusting every cupboard accordingly, we will discard as little material as possible.

art.nr+name	3966 / NYC water tower dresser
year	2016
size	160 x 60 x 86
material	cederwood
rrp	euro 4.108 - limited edition

art.nr+name	3966 / NYC water tower armchair, upholstered
year	2016
size	63 x 74 x 70 (42)
material	NYC water tower cedar / leather
rrp	euro 2.350

art.nr+name	3966 / NYC water tower coffeetable
year	2016
size	120 x 72 x 36
material	cedarwood
rrp	euro 2.840
