

**CRISIS** The Crisis collection owes its name to the first crisis we experienced as an established company and which lasted from 2001 until 2002. It turned out to be an insignificant one and, like many others, we weren't affected. So we then went and bought a computer-operated milling cutter. The first products we made with this machine were the Crisis furniture range. The initial concept was to deliver them as flat pack, and thus cheaper, furniture. Yet crisis or not, the customer wasn't interested in DIY furniture. For example, whenever we sold a chair in a bag, parts were often missing. However, the assembled versions did become a success.
